
is clips used to mix 2 or more input sources into one. It can be made of the same clips, but it could also be used to change the background of a clip. How to Create/Convert Mux? To create a matrix (or mux for short) you need to be in the options tab of the Mux clip. The first thing you need to do is to choose the input you want to use, then select the matrix in which you want to put it. You can also add to the matrix in the position you want to put it. The second thing you need to do is to choose the output you want to use and save the matrix. How to Create/Convert Matrix? To convert a clip to a matrix you need to be in the options tab of the matrix. The first thing you need to do is to choose the input you want to use, then select the output in which you want to put it. You can also add to the matrix in the position you want to put it. The second thing you need to do is to choose the video you want to use and save the matrix. What is the difference of Mux and Matrix? A clip in a mux or matrix is a clip you want to use. It is used to cut a video, while a matrix is a clip which you 6a5afdab4c

4Easyssoft AVI To AMV Converter Crack+ Activation Key
